

AIBI

Australian Institute of
Business Intelligence

The Australian Institute of Business Intelligence offers **industry-relevant** higher education programs. We practice a student-centred approach with smaller class sizes taught by experienced academics.

Outside of the classroom students have opportunities to apply their business knowledge in **client based projects**, participate in **industry networking** and **internships**.

Our vision is to prepare students for opportunities of the future by focusing on tomorrow's workforce and business needs.

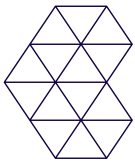

Apply for admission to AIBI today at: aibi.edu.au/apply

We **open doors** to a **world** of **opportunities**.

Bachelor of International Business

AACSB

Business
Education
Alliance
Member

The **Bachelor of International Business** is a multidisciplinary program for students who wish to establish a career in international business.

Students will learn about the special challenges associated with conducting business across national borders, diverse and different cultures, different legal and regulatory environments.

Students will be taught the fundamentals of businesses and learn how to employ strategic decisions necessary for management. Graduates will be equipped with the necessary skills to lead a team in a diverse range of careers.

Graduates will have the necessary skills and knowledge to work in a wide range of industries, including private and government sectors or possibly creating their own international business.

AIBI offers a blended learning approach through offering small class with active participation. Students will be able to apply their knowledge to real-life cases and projects taught by experienced academics and industry professionals.

Students enrolled in AIBI courses have the opportunity to undertake. **The Internship unit**, an internship unit that is one of the three electives available at 200 level. Subject to excellent results and permission from the Dean, this practical subject is designed to be the start of life-long learning bridging formal studies and the workplace. The unit allows students to spend a minimum of 150 hours and maximum of 6 months working with an employer on a project related to their discipline of study.

Bachelor of Enterprise Management Systems

AACSB

Business Education Alliance

Member

The **Bachelor of Enterprise Management Systems** is a degree that encompasses the skills and knowledge to succeed in the current market. The program focuses on the challenges associated with selecting, installing and maintaining systems which support business processes, data analytics and information flows within an organisation and with key external parties such as suppliers and customers, across a wide range of sectors and industries.

Students will be working with a contemporary industry standard enterprise systems software such as SAP and will have opportunities to interact with industry through guest lecturers, industry visits and case studies. Graduates will have the necessary skills and knowledge to work in a wide range of industries, including private and government sectors.

AIBI offers a blended learning approach through offering small classes with active participation. Students will be able to apply their knowledge to real-life cases and projects taught by experienced academics and industry professionals.
